GM,

Following the three bid process, I have reached out to our current vendor that we rent from and they don't do used sales for radios, I also emailed out to three other radio companies and only go a bid from one that looks like it works best for us, the bid is attached.

The 4 companies are as follows,

- Hi-Desert Communication, they don't deal in Motorola APX 7000
- Two Way Direct, they don't deal with Motorola APX 7000
- Day Wireless, our current vendor does not sell equipment and we rent our equipment at a cost of \$11,520.00 in the budget.
- Sunny Communication does used rebuilt Radios and quoted us a price to buy of \$13,994.23 and includes a 5 year warranty for the same equipment we currently rent.

While this is a bit more for out of the budget line item the end result is we own the equipment and will not be renting it anymore, it would be a one time buy with the 5 year warranty. Over the 5 years of warranty owning this equipment, this could have a cost savings of \$43,605.77 to the fire department budget.
